EXPERIENCE	<b>University of Washington</b> <b>Doctoral Student</b>	<b>Dept. of Mechanical Engineering</b> <b>In Progress</b>	
	<ul style="list-style-type: none"><li>Pursuing doctoral studies in precision instrumentation, optimal control, and model-based prediction</li></ul>		
	<b>Boeing</b> <b>Systems Engineer</b>	<b>Boeing Defense, Space, &amp; Security</b> <b>2022 - 2024</b>	
	<ul style="list-style-type: none"><li>Developed simulations and testing requirements to collect, process, and analyze real-time data from optical systems</li><li>Collaborated with multi-disciplinary teams to develop simulations and deliver data-driven solutions to customers</li><li>Identified knowledge gaps and assessed product functionality</li><li>Presented results to stakeholders, developed white papers, and met with customers to assess product requirements</li><li>Awards: Engineering Excellence, 2023</li></ul>		
	<b>Lockheed Martin</b> <b>Systems Engineer</b>	<b>Rotary &amp; Mission Systems</b> <b>2019 – 2021</b>	
	<ul style="list-style-type: none"><li>Developed models and simulations to optimize electro-optical system performance</li><li>Performed product lifecycle and root-cause analysis to assess product limitations</li><li>Presented results to stakeholders, developed white papers, and met with customers to assess product performance</li></ul>		
	<b>Harvard University</b> <b>Research Fellow</b>	<b>Division of Applied Physics, School of Engineering &amp; Applied Science</b> <b>2017 – 2018</b>	
	<ul style="list-style-type: none"><li>Developed model-based prediction methods for the behavior of patented electrohydrodynamic manufacturing processes [2]</li><li>Presented findings to faculty/researchers and published original research in peer reviewed journals</li></ul>		
	<b>Cornell University</b> <b>Researcher</b>	<b>Dept. of Fiber Science, Nano-Manufacturing Laboratory</b> <b>2013 – 2017</b>	
	<ul style="list-style-type: none"><li>Patented new manufacturing processes [1] and developed instrumentation, simulations, and control systems for the Intel Strategic Research Alliances (ISRA) program</li><li>Designed integrated systems for materials testing, rheological measurements, and thermal analysis [3]</li><li>Presented findings at technical conferences, and published results in peer reviewed journals</li></ul>		
<b>California Institute of Technology</b> <b>Research Technician</b>	<b>Dept. of Applied Physics &amp; Materials Science, Space Radiation Laboratory</b> <b>2009 – 2011</b>		
<ul style="list-style-type: none"><li>Developed computational tools to process and analyze data from space-based telescopes</li><li>Developed and tested high-voltage hardware for research in x-ray optics and plasma physics</li></ul>			
<b>Lawrence Berkeley National Laboratory</b> <b>Research Assistant</b>	<b>The Advanced Light Source, X-Ray Optics Laboratory</b> <b>2008</b>		
<ul style="list-style-type: none"><li>Developed calibration methods for the modulation transfer function of surface profilometers using optical metrology</li><li>Presented findings to faculty/researchers and published original research in peer reviewed journals [4][5]</li></ul>			
EDUCATION	<b>University of Washington</b>	<i>Mechanical Engineering</i>	<i>Ph.D. (In Progress)</i>
	<b>University of Washington</b>	<i>Entrepreneurship</i>	<i>Certificate (In Progress)</i>
	<b>Cornell University</b>	<i>Applied Physics</i>	<i>M.Eng.</i>
	<b>Rensselaer Polytechnic Institute</b>	<i>Physics</i>	<i>B.S.</i>
IP & PUBLICATIONS	<b>1. Methods and Systems for Electrospinning</b> , PCT/US2018/042354, January, 2019.		
	<b>2. [Editor's Pick] Journal of Applied Physics</b> , Volume 125, Issue 5, Controlled Deposition of Electrospun Nanofibers by Elecrohydrodynamic Deflection, February, 2019.		
	<b>3. Springer, Advances in Intelligent Systems and Computing</b> , Development of an Automated Pressure Sensitive Thermesthesiometer..., 2018.		
	<b>4. SPIE Volume 7448, Advances in XRay/EUV Optics and Components</b> , IV, ISBN: 9780819477385, Binary Pseudo-random Gratings and Arrays for Calibration of Modulation Transfer Function of Surface Profilometers: Recent Developments, 2009.		
	<b>5. Journal of Vacuum Science and Technology, Microelectronics and Nanometer Sci. B</b> , Volume 27, Issue 6, pp. 3213-3219, Development of Pseudo-random Binary Arrays for Calibration of Surface Profile Metrology Tools, 2009.		
COMPUTATION	Git, Python, C, C++, MATLAB, Linux, LabVIEW, COMSOL, ANSYS, Arduino, CAD, LaTeX, JIRA, Confluence, DOORS
